

Challenge Exercise 1.1

In this exercise, you read a real-world security policy that's currently in use and answer several questions about it. You need a computer with a Web browser and access to the Internet.

- 1.1 Using your Web browser, visit the Web page <http://www.uga.edu/compsec/> (especially <http://www.uga.edu/compsec/use.html> and <http://www.uga.edu/compsec/summary.html>) that contains the computer security policy for the University of Georgia's policy
- 1.2 Read the policy carefully.
- 1.3 Answer the following questions
 - a. What is the stated goal of this computer security policy?
 - b. What specific individuals/groups are charged with computer security responsibilities in this policy?
 - c. What enforcement mechanisms does the policy contain?
 - d. Does the policy contain flexible provisions that enable it to be applied to new technologies as they come into existence?
 - e. Is there anything that you feel is an important security issue that is not addressed in the policy?
