

Challenge Exercise 4.1

In this exercise, you search the Internet for disaster recovery plans and templates and compare and contrast various options. You need a computer with a Web Browser and Internet access

1. Using your Web browser and a search engine, locate three examples of disaster recovery plans or templates being used by organizations.
2. Identify the major areas of difference between each of the three plans, either in the high level structure or the low level description
3. Write a brief summary of one of the three plans, highlighting the areas where it does a good job and the improvements you would suggest to it.
